It is my understanding that allowing access to this pipeline for the purpose of exporting natural gas is not in the best interests of US citizens:

- 1.natural gas prices domestically will likely go up
- 2.leaks in the transmission will increase greenhouse gases without any energy benefit

Private energy companies do not necessarily or willingly act in the best interests of our citizens or with any concern for future generations anywhere on earth. There needs to be more time to examine this proposal. I am requesting an extension of the public comment period.
