TO: fergas@hq.doe.gov
Subject: FE Docket No. 14-179-LNG

I urge you to extend the comment period for the Pieridae LNG Export Permit application docket no. FE-14-179-LNG and require Pieridae to submit more details on its proposal in order to facilitate comments. These details should include the environmental impacts of the extraction, transportation and distribution of the gas throughout its life-cycle

Many of our recently-elected state and federal officials have not been notified of this submission and have not had the opportunity to comment. Considering the regional impact this project could have on natural gas supply, it is important for our representatives to participate in the review. There are currently several interstate pipeline projects proposed for the Northeast region that claim to serve year-round energy needs. None of these proposals (NED, AIM, CT Expansion, Atlantic Bridge, Access Northeast) have been completed and all face legal and environmental challenges. Construction of an export terminal to send much or all of this natural gas to Europe or Asia could further disrupt winter supply and grid reliability, not to mention the potential price increase, in the Northeast.

Sincerely,
Betsy Taylor-Kennedy
Bolton, MA
