**Date:** Monday, February 09, 2015 4:24:25 PM

---

To whom it may concern.

Each and every proposal that increases our dependence on fossil fuels makes it more difficult and more expensive to move to a clean, renewable energy future.

Furthermore, as we "scrape the barrel," we are using fossil fuels that are dirtier and dirtier. The methane leakage rates are threatening our chance to keep temperature increases below 2°C, let alone even higher - perhaps up to 9°F by 2080. I know people who may still be here in 2080.

Thank you for your consideration.

Please, put a moratorium on this project until all consequences have been analyzed and discussed. And please extend the comment period.

Thanks.
