---

To Whom It May Concern:

It is not in the public interest to export LNG when an about-face is needed to prevent civilization's demise from unmitigatable climate feedback loops.

Physics doesn't care who profits from LNG exports, but does tally cumulative impact. Methane's contribution to climate change says that for a survivable planet, we must keep 80% of our known proven reserves in the ground.

I ask that you please **do not allow the export of LNG.**

Also please **extend the comment period** as I learned of today's 4:30 p.m. deadline just a few hours ago.

Thank you...for my children's sake and for yours,

Gerri Wiley
