Subject: regarding LNG permit for M & N pipeline
Date: Monday, February 09, 2015 12:22:56 PM
Attachments: [REDACTED]

I am opposed to pipelines as they have negative impacts on the climate, our health and the environment. Please do not permit this LNG export proposal. It is not in the public interest, only the corporate greed.

Hattie Nestel
Massachusetts

Speaking about radioactive fallout, the late President John F. Kennedy said on July 26, 1963 upon signing the ban on above ground nuclear tests, "The number of children and grandchildren with cancer in their bones, with leukemia in their blood, or with poison in their lungs might seem statistically small to some in comparison with natural health hazards. But this is not a natural health hazard and it is not a statistical issue. The loss of even one human life, or the malformation of even one baby who may be born long after we are gone should be of concern to us all. Our children and grandchildren are not merely statistics toward which we can be indifferent."
