---

I am writing about Fe Docket No. 14-179-LNG. I have only learned of this application today. This has not allowed enough time to effectively comment or intervene. The comment period was not widely announced and an extension of time to comment and intervene in this proposal should be given. The authorization of export contracts is not in the public interest. Exportation of natural gas drives up domestic prices for gas because natural gas sells for 3 to 4 times as much in foreign markets, Exports weaken the American economy by lowering the supply available for domestic use. Natural gas is a greenhouse gas 86 times more potent than CO2. Studies show that leaks of gas from drilling, transmission and distribution make it no better for our environment than coal. These facts Clearly show that natural gas exports are not in the public interest.
