Comments on Export proposal

I oppose the export of LNG using the M&N pipeline because:

It will weaken the American economy by lowering the supply available for domestic use

Studies show that leaks of gas from drilling, transmission and distribution make it no better for the global environment than coal. Methane leaks from natural gas extraction is a greenhouse gas 86 times more potent than CO2.

Therefore, natural gas exports are not in the public interest

I request an extension of time to comment and intervene in this proposal because this comment period was not widely announced.

Sincerely,  
Micky McKinley
