FE Docket No. 14-179-LNG

To whom it may concern: I am writing to comment on the proposed plan to export natural gas from New England by constructing a natural gas pipeline through rural Massachusetts and New Hampshire. This is **not in our interest** and I cannot see any benefits to the residents who will have to sacrifice so much for the benefit of a corporation involved seeking to make a lot of money overseas. There is no need for any more natural gas in New England when we have Canadian hydropower right over the border. Where we live, nearly everyone heats with wood or wood pellets and uses oil for backup. The people who switched to propane discovered that the low prices in 2013 have turned into high prices in 2015. This is what will happen with natural gas as well. Please do not approve this plan cooked up by gold diggers who have not interest in preserving our rural way of life.

Susan Ross
