---

I am writing to urge you NOT approve Pieridae Energy's request to export gas using the M&N pipeline.

Opening up our domestic supply of natural gas would cause an increase in the extraction of our nation's shale gas reserves, already causing critical spikes in emissions of methane, which is 100 times more potent a greenhouse gas over a 25 year time span.

For the sake of the planet, our nation, and our precious environment and communities, I urge you to say NO to this request.

Sincerely,

Trellan Smith  
Oxford, New York
