Re: Cameron LNG LLC, FE Docket No. 15-90-LNG NFTA

Dear Deputy Assistant Secretary Paula Gant,

I am writing in strong support of Cameron LNG's application to construct two additional liquefaction trains – Trains 4 and 5 (Expansion Project) and increase their approved export volumes by 1.41 bcf/day of domestically produced LNG.

Cameron LNG has been a longstanding key member of the Southwest Louisiana community. I know from my previous experience as the former Calcasieu Parish Administrator that Cameron LNG is committed to making a positive impact on the entire Southwest Louisiana area by dedicating significant financial resources and time to the dozens of community programs, agencies, events, and hurricane relief efforts.

Cameron LNG has provided quality jobs, invested in our community through education, non-profits, health and the environment and contributed to our economic development programs. Cameron LNG's export facility is currently under construction for Trains 1-3 and is providing a boost to Louisiana's local and regional economy through increased economic activity.

This Expansion Project will further extend these benefits to the community over a longer duration and will provide additional permanent new jobs. Regionally, Southwest Louisiana will benefit from a large number of construction jobs that will be sustained by adding two additional trains to the current project. Nationally, the two additional trains will increase the market for domestically produced natural gas and internationally, the balance of trade will continue to improve through additional exports of LNG.

I look forward to Cameron LNG's continued success in Louisiana and DOE's support for Cameron LNG's Expansion Project. Thank you in advance for your consideration of this request.

Sincerely,

S. Mark McMurry
