Authorization of export contracts is not in the public interest; effects on climate, on domestic gas prices, on the American economy.

Natural gas sells for 3 to 4 times as much in foreign markets driving up the domestic prices here.

Exports lower our supply available for domestic use thus weakening the American economy.

Natural gas (methane) is a greenhouse gas 86 times more potent than CO₂. Leaks of gas from drilling, transmission and distribution make it no better for the global environment than coal.

Natural Gas export is not in the public interest.

I only learned of this application today and request an extension of time to comment and intervene.

Thank you
