Mr. John Anderson
U.S. Department of Energy Office Fossil Energy
100 independence Avenue, S.W
Washington, D.C. 20585 USA

Amendment : DOE/FE Docket No. 14-206-LNG

Dear Mr Anderson,

On November 3rd, 2014, Air Flow North America Corp, filed its application for authority to export Liquid Natural Gas (LNG) to Non Free Trade Agreement countries now docketed as 14-206-LNG.

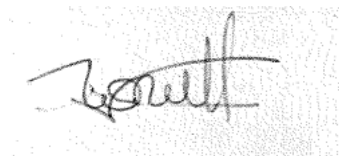

Air Flow North America Corp submits the following amendment to this application:

In section III, Description of Export proposal, please we would like to add the following information about Clean Energy Willis plant. "Clean energy Willis plant was built in 1994. It produces 100,000 gallons of LNG per day and are able to store 1 Million gallons on site. The Willis plant disposes of one loading rack allowing one truck to be loaded at a time. 12 trucks maximum can be loaded per day with LNG. The plant has an EPA permit for water moving in and out of the facility but doesn't have any environmental reviews or permits.

The purpose of this amendment is to ensure that the application accurately reflects the contract with Clean Energy, and to give more more information to the DOE allowing it to allow DOE to conclude that a CX for the facility(ies) is the appropriate environmental review under NEPA.

Thank you for your attention to this matter. If you have any questions regarding this filing, please contact the undersigned at +1 281 782 0672.

Respectfully submitted,

Kelly MARULL Air Flow North America Corp
