Pala Fire Station Solar Project

- The projected production over a 25 year period will result in a utility savings of approximately \$52,000/year or \$1.3 million over the life of the system.
- CO² emission reductions are the equivalent of planting 70,000 trees, saving 300,000 gallon of fossil fuels, recycling 10,000 tons of waste and displacing the CO² produced by 350 homes.
- To date, the system has generated 177,750 kWh of electricity and offset 222,000 pounds of CO².
