**Re: Application of SCT&E LNG, LLC - DOE/FE Docket No. 14-98-LNG**

Dear Ms. Moore

Attached please find Letters of Support for the project referenced above. The letters included in this email are from:

1. Cameron Parish Policy Jury, Cameron, Louisiana
2. Speaker of the House, Honorable Charles Kleckley, State of Louisiana
3. Louisiana State Senator, Dan Morrish
4. Stephen Broussard, Director of the West Cameron Port Authority
5. George Swift, President/CEO of the Southwest Louisiana Economic Devel Alliance
6. Thomas F. Harris, Director, Technology Assessment Div., Dept. of Natural Resources, State of Louisiana

Thank you for your assistance in this matter.

Sincerely,

A handwritten signature in black ink that reads 'Lisa Musick'.

Re: Application of SCT&E LNG, LLC - DOE/FE Docket No.  
14-98-LNG

Dear Ms. Moore:

I write in support of SCT&E LNG, LLC's (SCT&E LNG) application to export domestic natural gas to foreign nations with which the United States does not have a free trade agreement (non-FTA). This project represents a substantial investment in our community and will have significant positive benefits for Southwest Louisiana.

SCT&E LNG filed an application with the U.S. Department of Energy's Office of Fossil Energy (DOE/FE) requesting authorization to export liquefied natural gas (LNG) produced from domestic sources by vessel over a 30-year term. SCT&E LNG proposes to export this LNG from a terminal to be constructed on the east side of the Calcasieu Ship Channel at Monkey Island, Cameron Parish, in the State of Louisiana.

DOE/FE has noted in its conditional and final authorizations of other non-FTA LNG export applications that the 2012 LNG Exp01t Study found that LNG export projects, such as the SCT&E LNG project, will have net economic benefits in all scenarios examined. Granting SCT&E LNG's application will ensure that the Louisiana state and local economy share in these benefits. For example, among the many benefits that this \$9.25 billion project will provide are 2,000 construction jobs and additional employment opportunities for between 16,500 and 23,000

People nationwide that it will support. The economies of the State of Louisiana, the Gulf Coast region, and the cities of Cameron, Lake Charles, Hackberry and many others in proximity of the project will directly benefit from the immediate influx of investment and commerce during the construction and operation of the SCT&E LNG project.

SCT&E LNG already has demonstrated that it will be a strong corporate citizen in our community and those of us in Southwest Louisiana look forward to a long and mutually beneficial partnership with SCT&E LNG. For all the reasons outlined above, I urge DOE/FE to approve SCT&E LNG's non-FTA LNG export application.

Re: SCT&E LNG, LLC - DOC/FE Docket No. 14-98-LNG

Dear Ms. Moore:

This letter is to advise you of my strong support of the application of SCT&E LNG, LLC (SCT&E LNG, LLC) to export domestic natural gas to foreign nations with which the United States does not have a free trade agreement (non-FTA). This project will have significant positive benefits for Louisiana, the United States economy, and United States allies and trading partners around the world.

SCT&E LNG, LLC filed an application with the U.S. Department of Energy, Office of Fossil Energy (DOE/FE) on July 24, 2014, requesting authorization to export liquefied natural gas (LNG) by vessel over a 30-year term. SCT&E LNG, LLC would export this LNG from a terminal to be constructed on the east side of the Calcasieu Ship Channel at Monkey Island, Cameron Parish, in the state of Louisiana. The Natural Gas Act (NGA) creates a rebuttable presumption that natural gas exports to non-FTA nations are in the public interest. If that presumption is not overcome, the DOE must grant the requested authorization. As demonstrated by the application, the SCT&E LNG, LLC project advances the public interest and its application should be granted.

The SCT&E LNG, LLC project represents a significant total capital investment of approximately \$9.25 billion in the U.S. economy, much of it in Cameron Parish and throughout Southwest Louisiana. The project will create 2,000 construction jobs and support additional employment opportunities for between 16,500 and 23,000 people nationwide. As DOE/FE has noted in its conditional and final authorizations on other non-FTA LNG export applications, the 2012 LNG Export Study found that LNG export projects, such as the SCT&E LNG, LLC project,

will have net economic benefits in all scenarios examined. Granting SCT&E LNG, LLC's application will ensure that the local, state, and national economies share in these benefits.

The SCT&E LNG, LLC project will also provide a reliable source of natural gas to our allies around the world and this project will help lessen the U.S. trade deficit and stimulate domestic economic growth by providing a needed outlet for abundant supplies of U.S. natural gas.

I appreciate the hard work and dedication that the DOE/FE has given to the SCT&E LNG, LLC application to date. I support the project and urge DOE/FE to approve the SCT&E LNG, LLC non-FTA LNG export application. If I or my staff can be of any assistance to you, please do not hesitate to call.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chuck Kleckley', with a large, stylized flourish at the end.

Chuck Kleckley

**Re: Application of SCT&E LNG, LLC - DOE/FE Docket No. 14-98-LNG**

Dear Ms. Moore:

The Southwest Louisiana Economic Development Alliance (the Alliance) is writing to support the SCT&E LNG, LLC's (SCT&E LNG) application to export domestic natural gas to foreign nations with which the United States does not have a free trade agreement (non-FTA). This project represents a substantial investment in our community and will have significant positive benefits for Southwest Louisiana.

The Alliance represents a collaboration of government, business, non-profits and other agencies in the five parish area of Southwest Louisiana. We are made up of three separate organizations. The Chamber of Commerce has a business membership of over 1300 various sized businesses in the region or doing business in the region. The Alliance Foundation represents over 100 major companies and several local government agencies who are major multi-year financial stakeholders. The Southwest Louisiana Partnership for Economic Development is made up of the mayors and parish officials from the five parishes of Southwest Louisiana. These three organization, collectively make the regional economic development organization known as the Alliance.

We are aware that SCT&E LNG filed an application with the U.S. Department of Energy's Office of Fossil Energy (DOE/FE) requesting authorization to export liquefied natural gas (LNG) produced from domestic sources by vessel over a 30-year term. SCT&E LNG proposes to export this LNG from a terminal to be constructed on the east side of the Calcasieu Ship Channel at Monkey Island, Cameron Parish, in the State of Louisiana.

DOE/FE has noted in its conditional and final authorizations of other non-FTA LNG export applications that the 2012 LNG Export Study found that LNG export projects, such as the SCT&E LNG project, will have net economic benefits in all scenarios examined. Granting SCT&E LNG's application will ensure that the Louisiana state and local economy shares in these benefits. For example, among the many benefits that this \$9.25 billion project will provide are 2,000 construction jobs and additional employment opportunities for between 16,500 and 23,000 people nationwide that it will support. The economies of the State of Louisiana, the Gulf Coast region, and the cities of Cameron, Lake Charles, Hackberry and many others in proximity of the project will directly benefit from the immediate influx of investment and commerce during the construction and operation of the SCT&E LNG project.

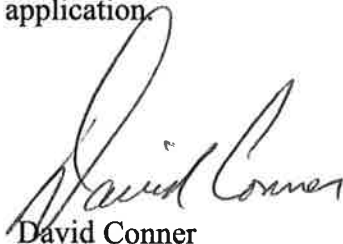

Further, Southwest Louisiana, as you are aware, is a major energy corridor for all of North America. With the construction of the SCT&E LNG project and several other LNG plants currently in construction or in various planning phases, Southwest Louisiana will become the hub of activity that will, one day, bring the United States of America into the strategic position of being an energy independent nation.

SCT&E LNG already has demonstrated that it will be a strong corporate citizen in our community and those of us in Southwest Louisiana look forward to a long and mutually beneficial partnership with SCT&E LNG. For all the reasons outlined above, we urge DOE/FE to approve SCT&E LNG's non-FTA LNG export application.

Respectfully,

George Swift  
President/CEO

**Re: Application of SCT&E LNG, LLC - DOE/FE Docket No. 14-98-LNG**

Dear Ms. Moore:

I write in support of SCT&E LNG, LLC's (SCT&E LNG) application to export domestic natural gas to foreign nations with which the United States does not have a free trade agreement (non-FTA). It is expected that this project will have significant positive benefits for both Louisiana and the U.S. economy.

SCT&E LNG filed an application with the U.S. Department of Energy's Office of Fossil Energy (DOE/FE) on July 24, 2014, requesting authorization to export liquefied natural gas (LNG) by vessel over a 30-year term. SCT&E LNG would export this LNG from a terminal to be constructed on the east side of the Calcasieu Ship Channel at Monkey Island, Cameron Parish, in the State of Louisiana.

According to reports, the SCT&E LNG project represents a significant total capital investment of approximately \$9.25 billion in the U.S. economy, much of it in Cameron Parish and throughout Southwest Louisiana. The project will reportedly create 2,000 construction jobs and support additional employment opportunities for between 16,500 and 23,000 people nationwide. As DOE/FE has noted in its conditional and final authorizations on other non-FTA LNG export applications, the 2012 LNG Export Study found that LNG export projects, such as the SCT&E LNG project, will have net economic benefits in all scenarios examined. Granting SCT&E LNG's application will ensure that the local, state, and national economies share in these benefits.

(225) 342-2710 • Fax (225) 342-5861 • <http://www.dnr.louisiana.gov>  
An Equal Opportunity Employer

The SCT&E LNG project would also provide a reliable source of natural gas to our allies around the world and this project will help lessen the U.S. trade deficit and stimulate domestic economic growth by providing a needed outlet for abundant supplies of U.S. natural gas.

For all the reasons outlined above, I urge DOE/FE to approve SCT&E LNG's non-FTA LNG export application.

Sincerely,
