Comment:

Epsilon's application is providing a solution to the low demand and lack of availability to store LNG. By creating contracts with nations that are still demanding LNG will allow the crisis of storage to be alleviated by moving supply, thus allowing production to still occur and save jobs of workers in this field. With the restrictions on what countries to provide LNG to also makes this application more reasonable so that we don't have issues exporting to countries like Venezuela. I support this application and think it should be approved so that the LNG sector can be stimulated economically. *🌐
